

I oppose any changes to the current FCC regulations on nudity and foul language on the Television and radio. I do not think that adding those to the media will be a benefit to society.

I ask that you please protect the families and children that do not wish to have foul language and nudity of the television and radio.

I believe that already the media takes things to liberally with the regulations that are in place. I have to screen everything that my children and family watch because I do not want them exposed to such horrible language and nudity.

Please uphold the current FCC regulations.
